# POSEIDON MED II

## sailing on the LNG era

Poseidon Med II project is a practical roadmap, which aims to bring about the wide adoption of LNG as a safe, environmentally efficient and viable alternative fuel for shipping and help the East Mediterranean marine transportation propel towards a low-carbon future. The project, which is co-funded by the European Union, involves three countries Greece, Italy and Cyprus, six European ports (Piraeus, Patras, Limassol, Venice, Heraklion, Igoumenitsa), as well as the Revithoussa LNG terminal.

The project brings together top experts from the marine, energy and financial sectors to design an integrated LNG value chain and establish a well-functioning and sustainable LNG market. With Poseidon Med II the East Mediterranean sets sail into the LNG era turning Greece into an LNG Bunkering hub in South East Europe.

Small Scale LNG Jetty  
(in design phase)

Truck Loading Station  
(under construction)
